

Product Data Sheet
SOLVENT GLOSS INK SYSTEM

General Information

Pro ColorFlex's Solvent Gloss Ink system is an alcohol based formula designed for most film and foil applications including PET/G, PVC, Polystyrenes, PLA and others, as well as all common paper in narrow web flexographic printing. This line of inks exhibits excellent adhesion and chemical resistance on films and papers where other inks don't adhere as well. It is fast drying, high strength and easy to use.

Key Features

- Easy to use
- Good viscosity stability
- Outstanding chemical/scratch resistance
- Excellent gloss
- Hi color density

Color Range

A complete range of Pantone® Formula Guide basic colors, pastel colors and four color process available. The same colors can be made in a Fade Resistant formulation, depending on the level of lightfastness required or conditions to withstand.

Additives

- Retarder: Add SL-0022 to slow down the drying time.
- Extender: Transparent White is used to lighten colors.
- Viscosity: Lower viscosity with SL-0017.

Safety and Handling

Refer to SDS for safety, handling and disposal information.

Typical Physical Data	
pH	***
Viscosity	300 – 500 cp
Weight / US gal. (lb/gal.)	8.00
Anilox Range	360 - 500
Anilox Range 4CP	600 - 800
